

Let's Roll Press Infinity Vibe Card

Printing & Assembly Instructions

1. Print the pages 2-sided, flipped on the short edge so that none of the white squares overlap on both sides.
2. Cut carefully around the outside of the full square
3. Cut out and remove the middle gray squares.
4. Fold the remaining frame along all edges to provide creases
5. Glue or double-sided tape the adjacent white squares together on one side
6. Now that you've glued the gray squares together on one side, do the same with the remaining gray squares.
7. Once glue is dry, fold outwards from the center to flip to the various colors.
